FOR IMMEDIATE RELEASE

Three Early Morning Fires in Concord

CONCORD, NH (April 13, 2021) – Three fires kept Concord Fire Department personnel busy this morning. The first two fires were reported just before 6 a.m. when Concord Fire Alarm started receiving multiple calls about heavy smoke along the railroad tracks by the south end of Storrs Street. Companies arrived on scene to discover two separate areas of trash and debris on fire. Additional Concord Fire units were requested to the scene to help extinguish the fires. The fires appeared to be intentionally set. While companies were operating on Storrs Street, a fire in the kitchen at the Harris Hill Center on Maitland Street was reported at 6:49 a.m. The first due fire engine had a delayed response as they were working to clear the fire scene on Storrs Street. When companies arrived on scene, they discovered a smoke condition on the first floor of the facility. The fire in the oven was controlled by the kitchen suppression system. Concord Fire personnel remained on scene for close to an hour ventilating the building so it could be safely reoccupied.
