NSF-7 Refrigerators

During the course of a routine food safety inspection, the City Inspector identified an NSF-7 beverage/display cooler or refrigerator designated by the internal data plate as intended for “the storage and/or display of packaged or bottled products.” Per the internal data plate, the cooler may or may not be approved for the storage of TCS products. These coolers are not intended for use cooling hot foods at a sufficient speed to meet FDA Food Code safety standards.

INSPECTION DATE:

Serial # of NSF-7 Cooler

Serial # of NSF-7 Cooler:

NSF-7 Pre-Existing Non-Conforming Agreement

I, the manager, owner, or duly authorized representative of the establishment identified above, have been notified that the coolers listed above are limited by the details of the data plate on the equipment in their function, and will resolve any non-compliance as follows:

1. Refrigerators that are listed “not for storage of TCS/potentially-hazardous foods” may not be used to store any products other than pre-packaged, non-TCS food. State the new storage location for all relevant products in the space below:

2. NSF-7 coolers are not suitable for the cooling of prepared foods. No food will be cooled in this cooler.
3. If TCS (temperature control for safety) products may be stored in this cooler per the data plate, these products will be properly cooled per FDA Food Code best recommended practices in an **approved** cooler.
4. Temperature logs will be maintained, and will be available on location for any food safety inspections or site visits by City Inspectors.
5. I understand that failure to comply with this policy may result in the condemnation of product improperly stored in NSF-7 cooler(s).
6. I understand that when my NSF-7 cooler stops working, it **must be replaced** with an NSF or commercial equivalent cooler that is designed for use to cool hot foods, and has been **pre-approved** by the Health Officer.

By signing below, I agree that the above protocols apply to all identified NSF-7 coolers (listed above by location) in my establishment.
